ROUND 3 PROPOSALS - Pool New Projects

@energiasocial

FROM THE UNION OF @ENERGIASOCIAL & @VENTUSGLOBAL, A RENEWABLE ENERGY SOCIAL ENTERPRISE WITH MORE THAN 3000 MW INSTALLED AND PRESENCE IN 4 LATAM COUNTRIES.

A social renewable energy company with 51% of its shares tied to the social contract and its purpose of developing models and comprehensive strategies for sustainable economic social development.

@energiasocial

4. High-quality education,
inclusive and fair.

7. Access to clean energy
and affordable.

8. Employment and sustainable and
inclusive economic growth.

13. Reduction of specific CO₂
emissions.(kg/kWh)

RENEWABLE ENERGY

[E <p>] 3 = [Energy *<purpose>] 3 Scales

Purpose algorithms on energy. Our purpose-driven energy business model is based on the commercial development of renewable energy at three scales. The economic result of these actions is focused on the research and development of educational programs focused on labor inclusion, sustainable urban planning projects and strategies, and fintech microfinancing tools using blockchain technology and its full potential.

TRIPLE IMPACT PROGRAMS _ #ACADEMIASOLAR 2023

APPLIED EDUCATION PROGRAMS

Labor Inclusion In Green Jobs

@energiasocial

The main objective of the #SolarAcademy of @energiasocial is to train young people and students in the design and implementation of ON-GRID and OFF-GRID photovoltaic solar energy systems, provide them with the necessary knowledge and the first practical work experience within the area of renewable energy.

SUSTAINABLE SOCIAL URBAN DEVELOPMENT

PROTOTYPE #1 SUSTAINABLE SOCIAL HOUSING

@energiasocial

BIOCLIMATIC CONSTRUCTIONS PROCREATE ARGENTINA

Development of open source modular architecture prototypes to bring housing solutions to the most vulnerable sectors, creating valuable work. The program is focused on training and labor inclusion and commercial development through the production and commercialization of sustainable, modular and energy efficient construction systems.

BLOCKCHAIN & AI INTEGRATION

@energiasocial

1. AISD // AI-POWERED APP FOR SOCIAL SUSTAINABLE DEVELOPMENT / POWERED BY @ENERGIASOCIAL

AI and Blockchain working together has the potential to facilitate the creation of resource-efficient smart cities and comprehensive circular economy strategies.

@energiasocial

@energiasocial AI-powered app for Social Sustainable Development - SDAI App aims to leverage artificial intelligence to address social and environmental challenges and promote sustainable development focused on promoting and accelerating the transition to a sustainable energy economy. The app will serve as a platform that connects users, NGOs, businesses, and governments to collaborate on initiatives, share resources, and gather insights for informed decision-making.

@energiasocial

The proposal is complementary and part of @energiasocial's comprehensive long-term sustainable development strategy to generate impact in the LATAM region in the execution of its business model based on the concept of energy with a purpose and will be linked to projects under development. in parallel of ;

@energiasocial

2. SOLARGATE DAO // CARDANO RENEWABLE ENERGY SOCIAL BUSINESS // EMPOWERING COMMUNITIES WITH SOLAR ENERGY SOLUTIONS POWERED BY @ENERGIASOCIAL

Create a DAO and a decentralized governance model for transparent management and stakeholder engagement in our renewable energy social enterprise operations and economic outcome management.

@energiasocial

Our solution proposal aims to address the problem of the inefficient management of a renewable energy social enterprise and the administration of the resources generated by the economic results of the sales and commercialization of energy. We perceive this issue as an obstacle to transparency and stakeholder participation in decision-making processes, which can affect the company's long-term sustainability and social impact.

To address this problem, the creation of a Decentralized Autonomous Organization (DAO) and a decentralized governance model are proposed. This approach enables a transparent and inclusive system in which stakeholders, including token holders, community members and relevant government agencies, can actively participate in the company's management and decision-making processes. The DAO will be governed by smart contracts and consensus mechanisms, ensuring efficiency, transparency, and accountability.

BY ADOPTING A DAO FORMAT, OUR RENEWABLE ENERGY SOCIAL ENTERPRISE WILL OFFER THE FOLLOWING KEY BENEFITS:

A. Decentralized Ownership and Control – The DAO structure allows for a distributed ownership model, allowing people in the Cardano community and beyond to become token holders and have a direct say in governance and decision-making processes . This decentralized ownership ensures that the company is driven by the collective wisdom and interests of its stakeholders.

B. Transparent and Inclusive Governance: The DAO model ensures transparency by leveraging blockchain technology and smart contracts. This transparency builds trust among stakeholders as they can track resource allocation, financial performance, and project milestones in real time. In addition, the inclusive decision-making process allows token holders to actively participate and contribute to the direction and growth of the company.

C. Social and Environmental Impact: The Renewable Energy Social Enterprise, owned and controlled under a DAO format, will have a substantial positive impact. It will contribute to the clean energy transition, reduce greenhouse gas emissions and create job opportunities in the renewable energy sector. By integrating social and environmental goals into its governance, the company will align economic success with sustainable development.

D. Empowering the Cardano community: The adoption of a DAO format for the renewable energy social enterprise is important to the Cardano community and ecosystem. It showcases the practical application of Cardano's underlying blockchain infrastructure, highlighting its capabilities beyond the financial sector. This demonstrates the potential for Cardano to facilitate decentralized governance and social impact initiatives, fostering the growth and maturity of the Cardano ecosystem.

3. BLOCKHOME // CARDANO SUSTAINABLE MODULAR HOUSING // ECO HABITAT REVOLUTION PROMOTED BY @ENERGIASOCIAL

An open source platform on the Cardano blockchain to design, build and distribute affordable modular social sustainable housing through transparent and decentralized processes.

@energiasocial

4. SOLARWISE // CARDANO RENEWABLE ENERGY ORACLE // LIBERE EL PODER DE LOS USUARIOS Y LAS COMUNIDADES IMPULSADO POR @ENERGIASOCIAL

Un oráculo de cadena de bloques de energía renovable en Cardano, cree y use el token de energía @energiasocial, para rastrear e incentivar de manera transparente la adopción de energía solar en Argentina y LATAM.

@energiasocial

5. GREENCYCLE // CARDANO'S SMART WASTE MANAGEMENT AND RECYCLING SOLUTION POWERED BY @ENERGIASOCIAL

An intuitive and easy to use application that allows users to manage their recycling and waste activities effectively and allows them to contribute to a greener environment.

@energiasocial

6. GREENPULSE // CARDANO CARBON FOOTPRINT CALCULATOR // MEASURE. ACT. MAKE AN IMPACT POWERED BY @ENERGIASOCIAL

Provide users with an easy-to-use app that quantifies their emissions and environmental impact and incentivizes emissions reduction through a blockchain-based carbon credit system using ADA rewards.

@energiasocial

@energiasocial and @txpipe have signed a joint development agreement to explore blockchain integration into @energiasocial #energywithpurpose business models and help scale the impact of our socially sustainable integrated strategies in Argentina and the LATAM region.

@energiasocial

THE DIFFERENCE BETWEEN BELIEVING YOU CAN CHANGE SOMETHING AND KNOWING YOU CAN

@energiasocial and @txpipe have signed a joint development agreement to explore blockchain integration into @energiasocial #energywithpurpose business models and help scale the impact of our socially sustainable integrated strategies in Argentina and the LATAM region.
